## **W Prague narrative**

W Prague is the new pulse within this iconic hotel building on the vibrant Wenceslas Square. Once occupied by the pioneering Czech restaurateur and hotelier Karel Šroubek, this centrepiece stay has been a beacon of innovation for centuries. The Grand Café that welcomed historical figures, artists and authors is now reimagined by W Prague, beckoning a new generation of daring creatives to its doorstep.

From The Rooftop, where revolutions once roared below, witness the gothic spires, fairytale vistas and the city's remarkable ability to emerge from darkness and turmoil more beautiful than ever. Baroque facades, the astronomical clock and an oh-so-romantic charm, tell a story of beauty, resilience and enduring magic that continues within W Prague. Golden elixir details throughout add a touch of enchantment, while the fantastical garden mural, painted by Czech artists Michal Skapa and Ondrej Vyhnanek, invites admirers into a whimsical world of cosmic wonders and floral delights. Art-Nouveau-inspired curves and turns pay homage to an architectural era and guide the curious through a labyrinth of restaurants and bars where no craving goes unfulfilled. Where energy and moments and dreams never cease.

Welcome to the revival. Welcome to W Prague.
