

## The New “No-knife” Facelift

📄 Author: Mike Bosnovic 📅 Post date: April 8, 2019

Wouldn't you like a cutting-edge facelift alternative that involves no actual cutting? Here to make your skin care dreams come true, nu-beau offers the Pyramid Facelift – a no-knife facelift that's a safe and pain-free alternative to a surgical facelift.

They say 3's the magic number and, with the magical combination of the 3 processes and technologies below used in each Pyramid Facelift treatment, there's really no need to go under the knife:

1. TriFractional Radio Frequency
2. VoluDerm (microneedling)
3. TriPolar with DMA (radio frequency with Dynamic Muscle Activation)

“As well as amazing lift (evidence of which can be seen from the first treatment), your skin will look smoother and more radiant with the Pyramid Facelift.”

### What is microneedling?

Microneedling is the insertion of very fine short fine needles (0.5-2.5mm diameter) into the skin, only surface-deep, that feel like faint pin pricks. Skin treated over four microneedling sessions, one month apart, produced up to a 400% increase in collagen and elastin 6 months post-treatment (according to a [2008 study](#)).

### What is radio frequency?

Radio frequency energy is an aesthetic technique used to heat tissue and stimulate collagen production beneath the skin's surface in order to reduce the appearance of fine lines and promote skin tightening. The technique encourages the production of new collagen and elastin too.

### Radio frequency and microneedling: a facelift match made in heaven

If you're going for young looking skin, we're talking cherub's bottom soft and smooth here, then the [Pyramid Facelift could be the miracle](#) you're looking for. No knife, no pain, no down-time – just pure radiance.

Within each 1-hour anti-ageing alternative facelift treatment, radio frequency and microneedling will work hand in hand to create miniscule punctures to the skin (which you can neither see or feel in most cases) and this acts to stimulate the production of new collagen and elastin to make the skin plumper and more firm.

As well as amazing lift (evidence of which can be seen from the first treatment), your skin will look smoother and more radiant with the Pyramid Facelift. The rapture doesn't stop at treatment number 1 (after which you'll already look feel divine), you'll see a new plump to your existing collagen for around eight weeks after and you'll experience extra collagen production, which helps to continue tightening and contouring the skin, for around 2 years. You'll be on cloud nine before you know it!

### Book you “no-knife” facelift at nu-beau

While you'll see [transformational results from your first Pyramid Facelift treatment](#), we recommend a series of 2-3 treatments (which we'll discuss at your free, no-obligation consultation) for incredible results that were previously only achievable when going under the knife. Our super-safe and pain-free facelift alternative treatments costs £360 for the first session but you could make a saving of more than £200 when you book a course of 3 treatments.
